

What Country Listens to the Most Metal?

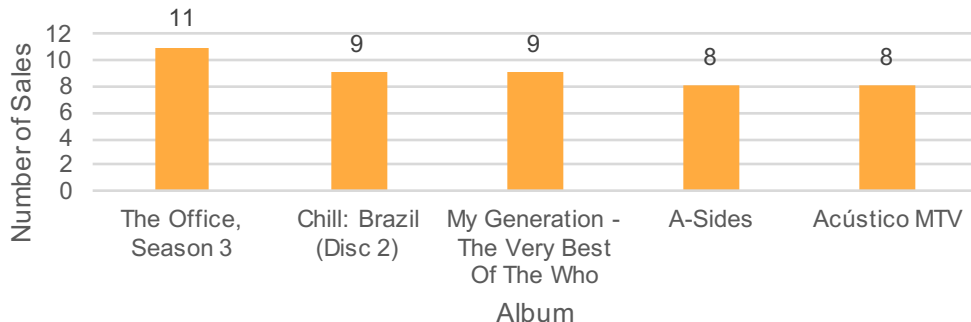

Top 10 Countries who Listen to Rock Music

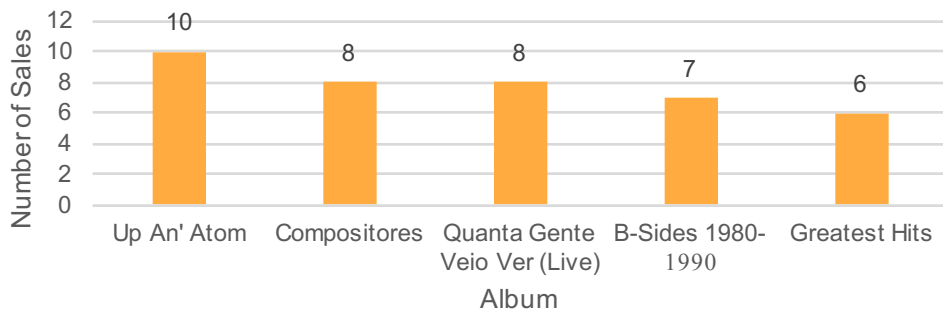

This bar chart shows that the country that listens to the most metal music is the USA. It is followed by Canada which listens to about two thirds as much and then Germany which listens to about one third as much. Because the top two countries are in North America, it can be surmised that metal music is more popular there than in other continents.

What Were the 5 Most Sold Albums in 2012 and 2013?

5 Most Sold Albums in 2012

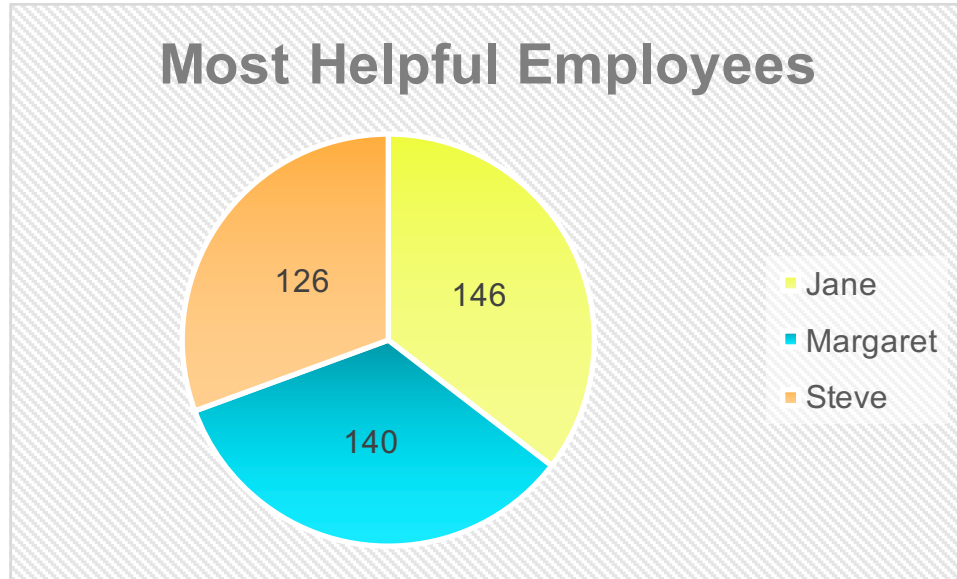

5 Most Sold Albums in 2013

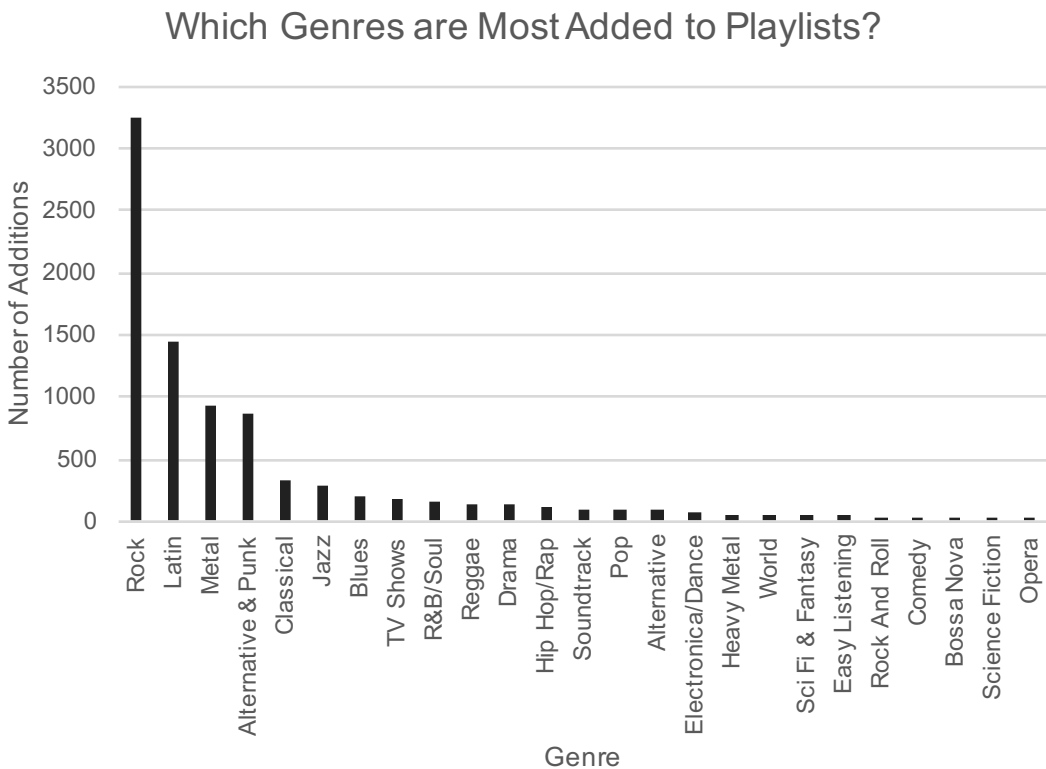

These two bar charts show the most sold albums in two subsequent years. In 2012, the most sold album was The Office, Season 3 while in 2013, the most sold album was Up An' Atom. Notice that no album has made the top 5 list in both years, which may be an indication that people tend to buy new albums that were released in the same year.

Which Employees are the Most Helpful?

The data shows that only three employees (out of 8) were assigned to support customers purchasing tracks. Out of these employees, Jane has helped the most customers make purchases, followed by Margaret then Steve. This pie chart offers an easy way for management to decide who should receive a day off in the upcoming holidays.

Which Genres are Most Added to Playlists?

The genre that is most added to playlists is Rock. In fact, it is twice as apparent in playlists as Latin, which comes second. Next, come Metal then Alternative & Punk. This bar chart shows that the rest of the genres aren't as apparent in playlists, and only the top 4 mentioned above were added to playlists more than 500 times. Opera is the least added genre to playlists as it was added only 5 times.
